2024 Annual Air Quality Survey Executive Summary

Overview and Methodology

Between June and August 2024, the Mid-America Regional Council (MARC) conducted an Annual Air Quality Survey of residents in the metropolitan Kansas City area. The survey is part of an ongoing effort to measure the impact that air quality education efforts have had on the public's overall awareness and behavior. The Annual Air Quality Survey provides a benchmark for objectively evaluating the sustained impact of air quality education. The survey has been conducted annually since 1998.

ETC Institute selected a stratified random sample of households in the metropolitan Kansas City area to complete the survey. The sample was address-based and was stratified to ensure the completion of at least 800 surveys, with 160 surveys in each of the following counties: Wyandotte and Johnson Counties in Kansas and Clay, Platte and Jackson Counties in Missouri. Text messages were sent to residents in the sample encouraging participation and included a link to an online version of the survey, which was provided in both English and Spanish.

A total of 840 households completed the survey. The number completed for each county was: 165 in Clay, 172 in Jackson, 175 in Johnson, 161 in Platte, and 167 in Wyandotte. The results for the random sample of 840 households have a 95% level of confidence with a precision of at least +/- 3.4%. Individual survey responses were weighted to reflect the actual population of each county within the five-county region. The latest census data show the following population distribution by county in the MARC Air Quality region: 14% in Clay, 39% in Jackson, 32% in Johnson, 6% in Platte, and 10% in Wyandotte.

Major findings from the 2024 Annual Air Quality Survey are highlighted on the following pages. A complete set of the results is provided in the next three sections of this report. Comparisons with previous years are addressed in the "TREND DATA" graphs. Items identified as "*statistically significant*" changes were changes of more than 3.4% from 2023 to 2024.

Major Findings

PERCEPTIONS OF AIR QUALITY IN THE KC METRO AREA

- Seventy-eight percent (78%) of the residents surveyed were "very" or "somewhat concerned" about the health consequences of poor air quality in the Kansas City area. This was 9% higher than in 2023. In 1998, 88% of residents surveyed were "very" or "somewhat concerned" about the health consequences of poor air quality in the Kansas City area.
- Forty-eight percent (48%) of residents felt air pollution in the Kansas City area was "getting much worse" or "getting somewhat worse," 36% felt it was "staying the same," 9% felt it was "getting somewhat better," 2% felt it was "getting much better" and 6% did not know.

IMPACT OF AIR QUALITY EDUCATION EFFORTS

- Sixty-four percent (64%) of residents felt their level of awareness about air quality issues in the Kansas City area was the same compared to last year, 27% felt they were more aware, 7% felt they were less aware, and 2% did not know or indicated the question was not applicable to their situation because they did not live in the area during the last year. The percentage of residents who felt they were "more aware" of air quality issues was 12% higher than in 2023.
- Thirty-one percent (31%) of residents indicated that they had seen or heard promotional materials about air quality in the Kansas City area during the past year. This was a decrease from 46% that was reported in 2023.
- The most frequent source of promotional media for air quality information was TV news/weather (81%). Some of the other more frequent sources were: radio (28%), social media (X, Facebook, Instagram, etc.) (27%), KC Scout lighted highway message boards (24%), internet (other than social media) (20%), and billboards (11%).
- Sixty-one percent (61%) of the residents surveyed remember seeing or hearing notifications about days with high levels of smoke or particulate matter.
- More than half (52%) of residents had seen "Skycast" information during weather forecasts on their local television news. This was a statistically significant increase from 43% in 2023
- Seven percent (7%) of residents reported they had heard about the AirQ program or AirQKC.org. In 2023, 10% indicated they had heard about the AirQ program, and in 2022 5% reported they had heard about the AirQ program.

PERCEIVED IMPORTANCE OF SKYCAST, OZONE ALERT DAYS AND THE REDUCTION OF AIR POLLUTION

- Ninety-six percent (96%) of residents felt it was "very important" or "somewhat important" for local television news stations to provide Skycast (Ozone Alert) information to the public. This was an increase from 93% that was reported in 2023.
- Seventy-two percent (72%) of residents felt it was "very important" or "somewhat important" to know that it was an Ozone Alert Day in the Kansas City area. This was a decrease from 83% that was reported in 2023.
- The number one reason residents felt it was important to reduce air pollution was the health effects (55%). Residents also felt it was important to reduce air pollution because of global warming/climate change (48%).

WILLINGNESS TO IMPROVE AIR QUALITY

- The activities that residents were most willing to do on an Ozone Alert Day, based upon the combined percentage of residents who were "very willing" and "willing," were:
 - not overfilling or "topping off" their gas tank (86%)
 - o fill up their car with gasoline in the evening rather than the day (84%)
 - o postpone mowing the lawn (84%)
 - o adopt driving habits that reduce emissions (84%)
 - o not using lighter fluid on an outdoor grill (83%)
 - o postpone the use of paints or solvents (81%)
- There was a statistically significant increase in 5 of the 12 activities that residents reported they were "more willing" to do compared to 2023. There were two significant decreases from 2023.

MOTIVATION TO REDUCE AIR POLLUTION

- The following situations would motivate residents most to take action to help reduce air pollution:
 - o saving money (76%)
 - o health effects of air pollution (74%)
 - o knowing an Ozone Alert has been issued (72%)
 - o feeling the action is the "right thing to do" or good for the environment (69%)
 - knowing the action is easy/will not interfere with routine (64%)
- There were four significant decreases in situations motivating residents to reduce air pollution from 2023.

SUPPORT OF GOVERNMENT EFFORTS TO HELP REDUCE GAS EMISSIONS

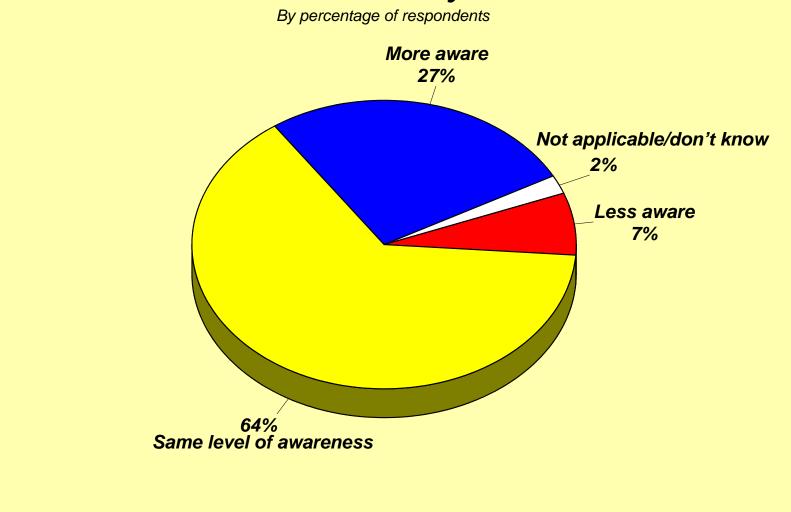

• Eighty-three percent (83%) of the residents surveyed supported efforts by the Municipal or County government to help reduce greenhouse gas emissions; this was an increase of 5% from 2023. The top three strategies that residents felt the government should use to help reduce greenhouse emissions were: using energy from renewable sources (78%), planting more trees (72%), and improving public transit (64%).

OTHER FINDINGS

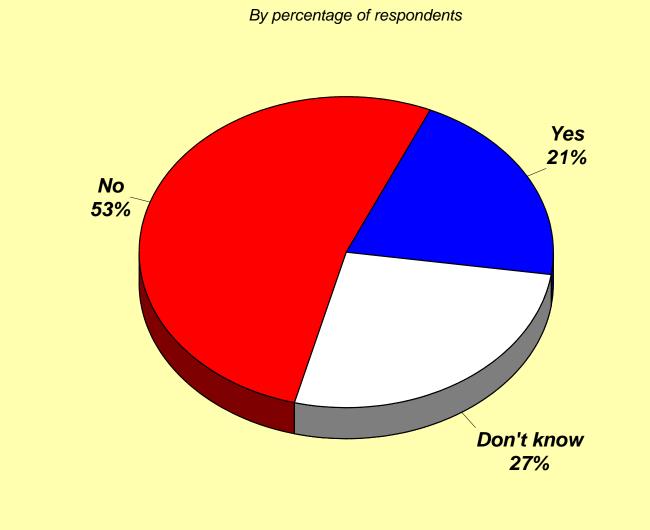

- The top three sources that residents most preferred to receive information about air quality in the community were: television (62%), an internet source that is easy to find (62%), and Facebook (35%).
- Twenty-one percent (21%) of residents thought the natural environment would be better in the future, 53% did not, and 27% did not know.

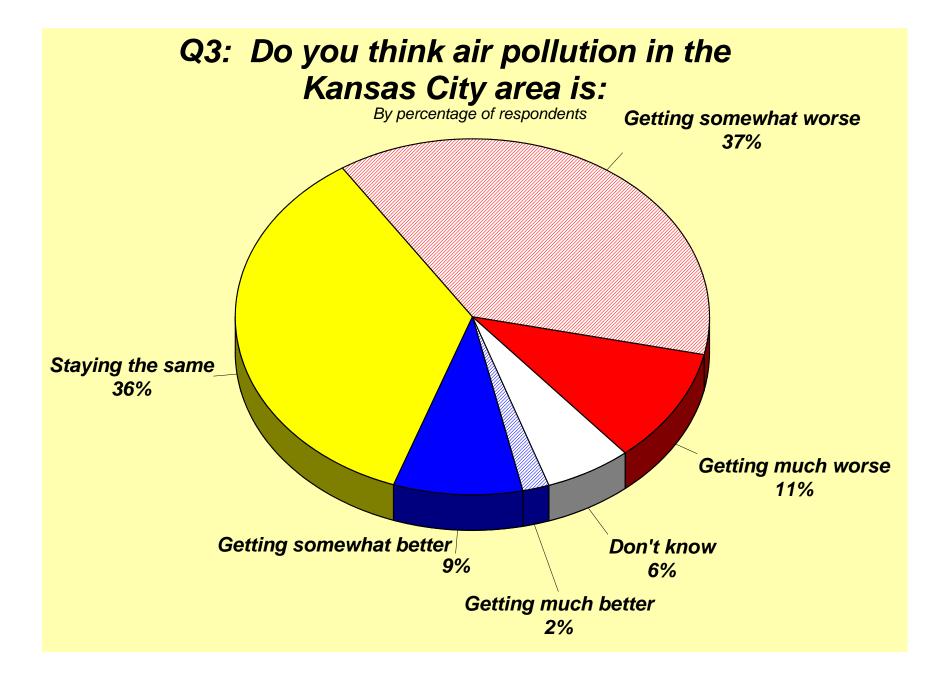

Section 1: Charts and Graphs

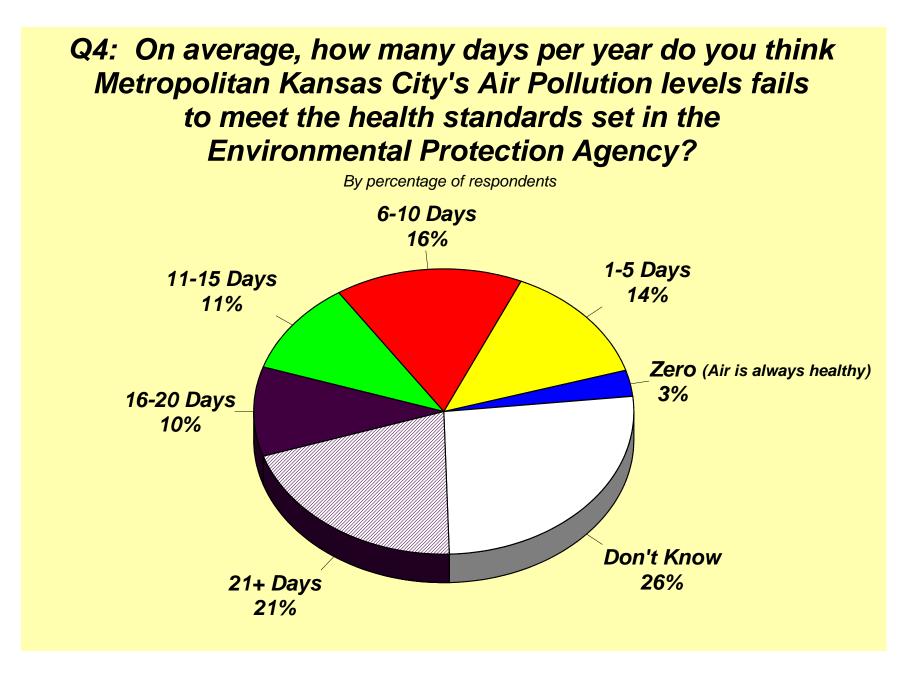

Q1: Compared to last year, how would you rate your level of awareness concerning air quality issues in the Kansas City area?

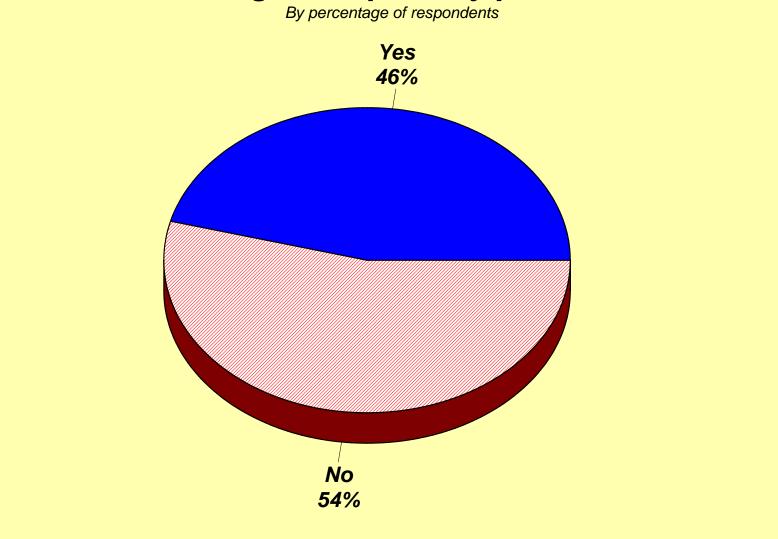

Q2: Do You Think That Our Natural Environment Will Be Better in the Future?

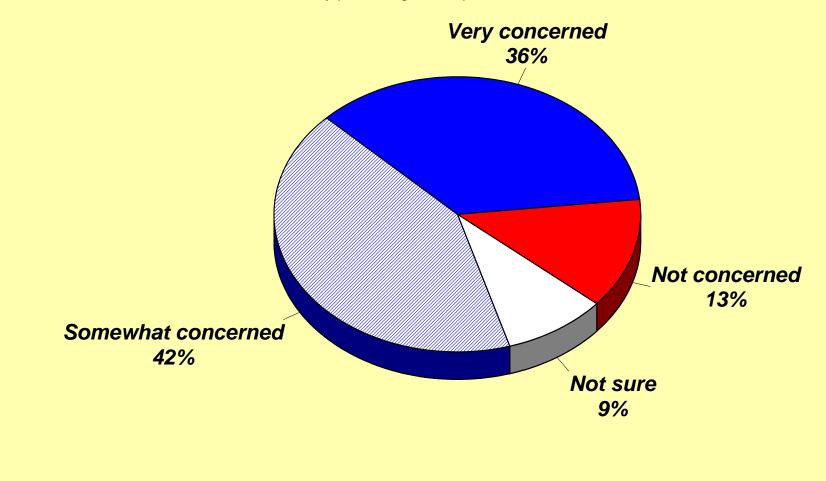

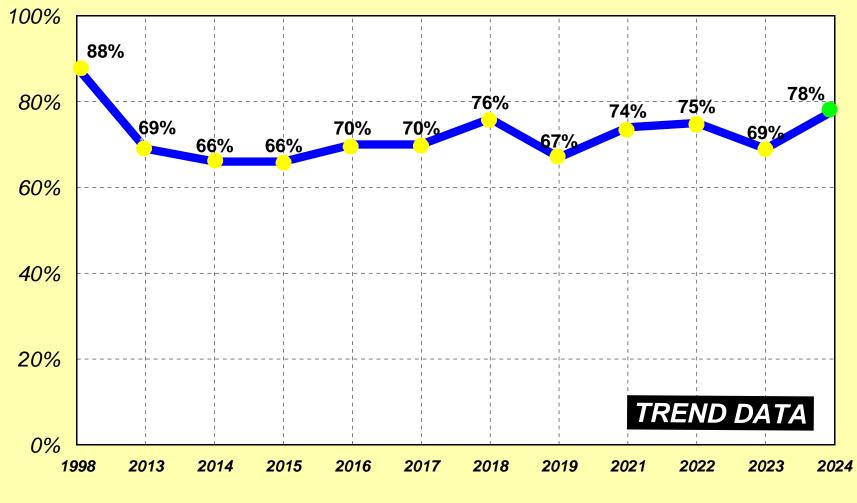

Q5: Do you or does anyone in your household have a breathing or respiratory problem?

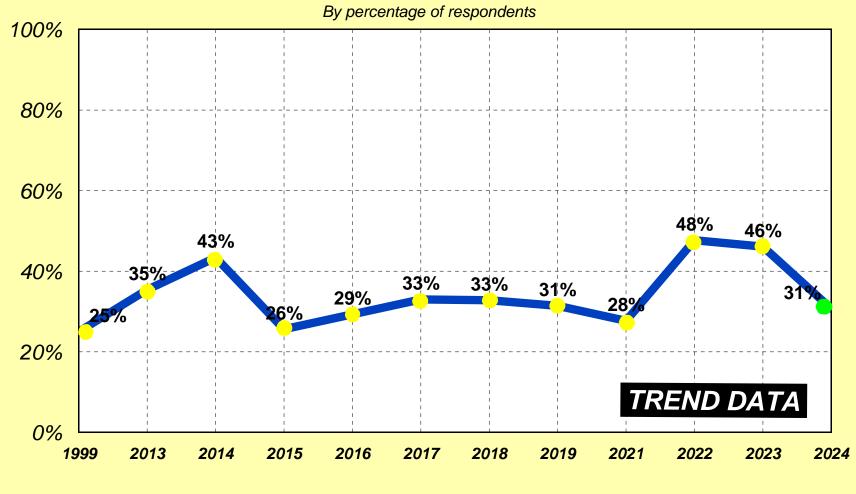

Q6: How concerned are you about the health consequences of poor air quality in the Kansas City area?

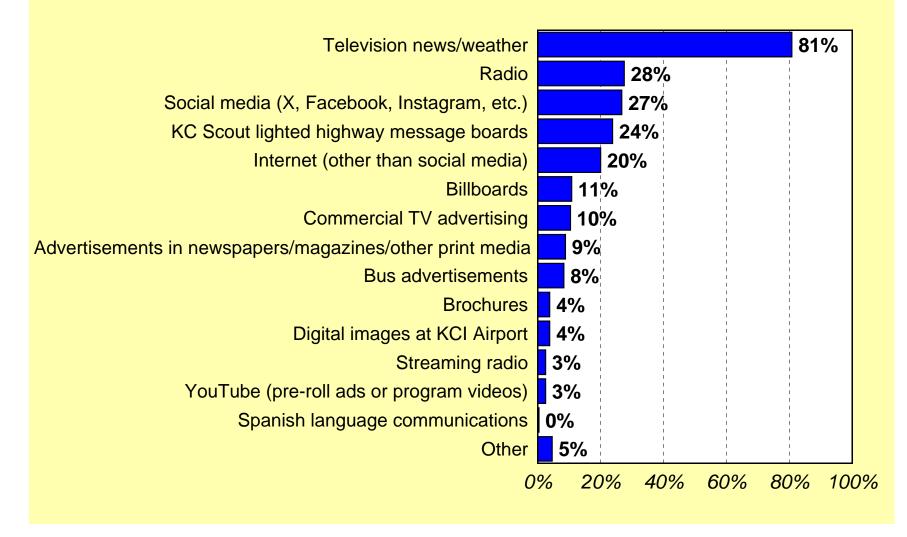

Q6: Percentage of Residents Who Were Very or Somewhat Concerned About the Health Consequences of Poor Air Quality in the Kansas City Area

Q7: Percentage of Residents Who Had Seen or Heard Any Advertisements, Public Service Announcements, Brochures, Billboards, Radio or Other Promotional Media About Air Quality in the Kansas City Area During the Past Year

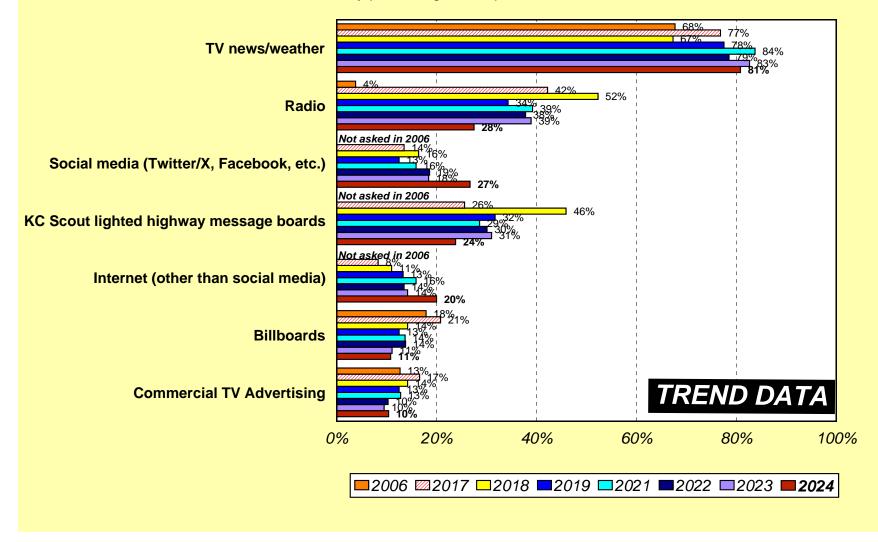

Q7a: What types of promotional media did you see or hear?

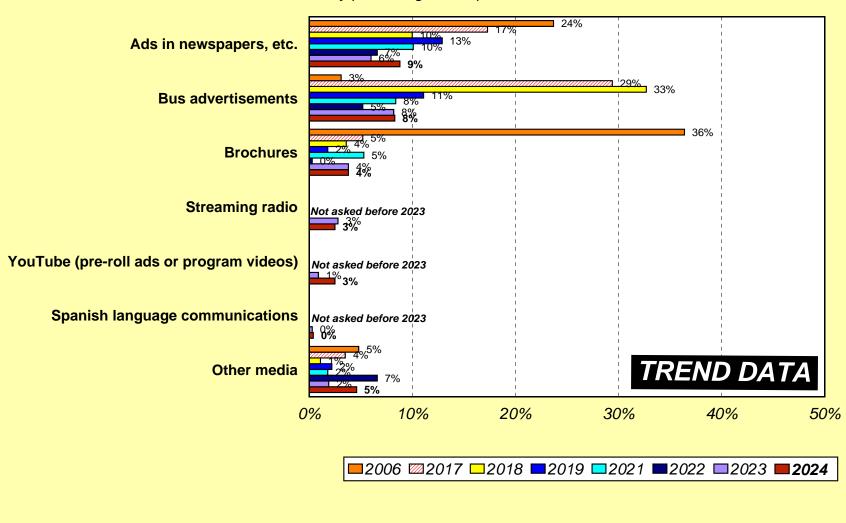

Q7a: What types of promotional media did you see or hear?

By percentage of respondents

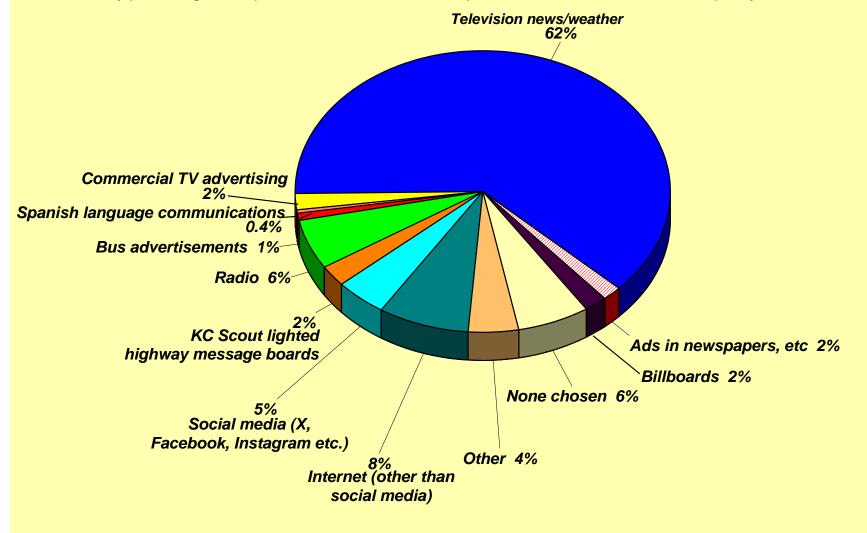

Q7a (CONTINUED): What types of promotional media did you see or hear?

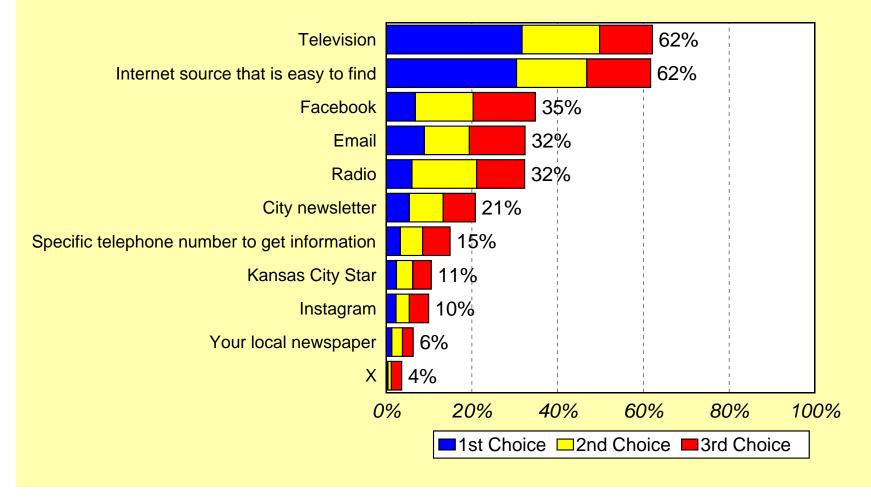

Q7b: Which ONE of the promotional media is your most frequent source of information about air quality?

By percentage of respondents have seen or heard promotional materials/media in the past year

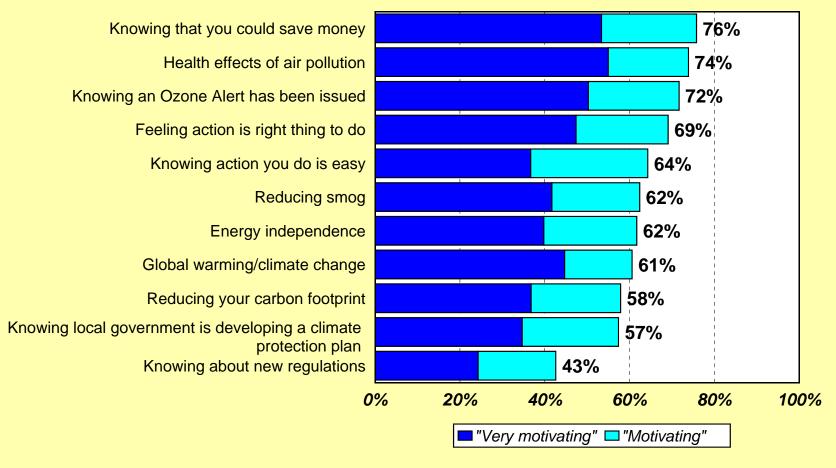

Q8: Which THREE of the following sources would you MOST prefer to receive information about air quality in your community?

By percentage of respondents who selected the item as one of their top three choices

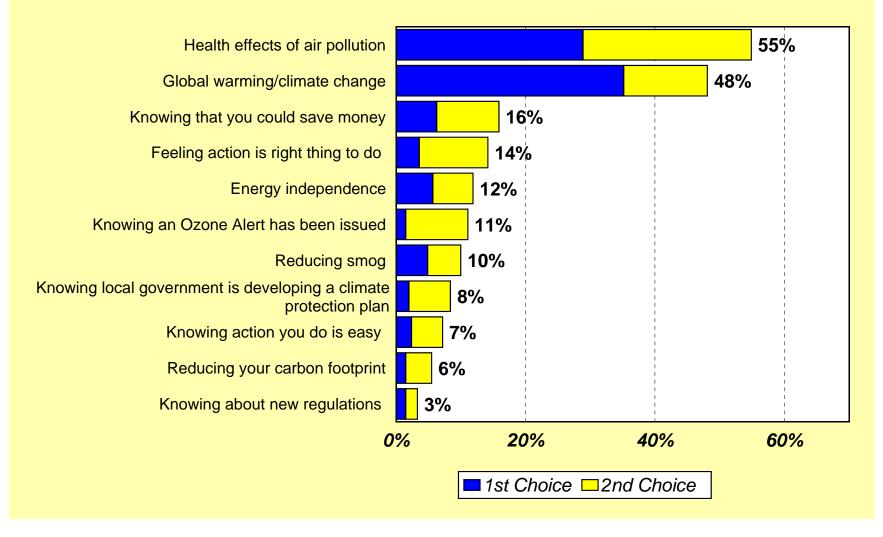

Q9: Level of Motivation Various Situations Would Give Residents to Reduce Air Pollution in the Kansas City Area

Based on the percentage of residents who rated their motivation on a scale of 1-5 where 5 was "very motivating" and 4 was "motivating")

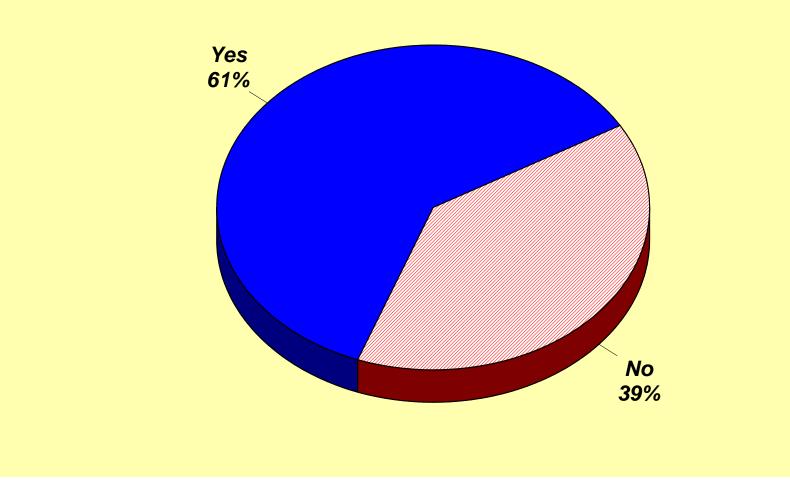

Q10: Reasons Residents Felt It Was Important to Reduce Air Pollution

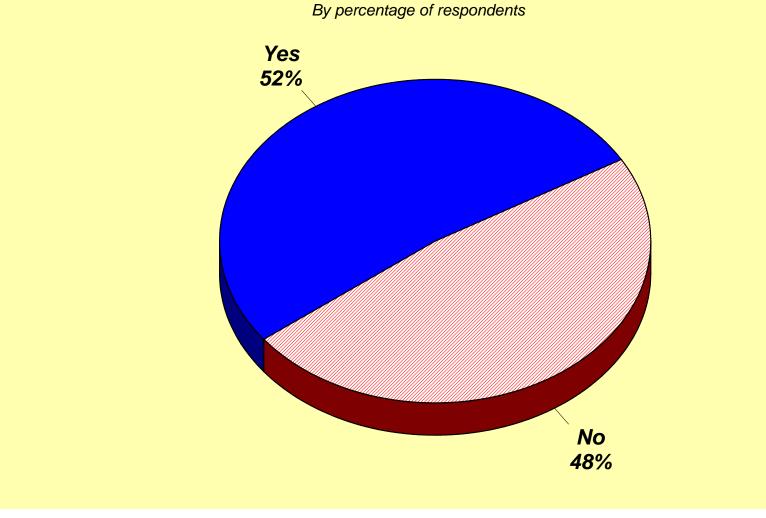

By percentage of respondents who selected the item as one of their top two choices

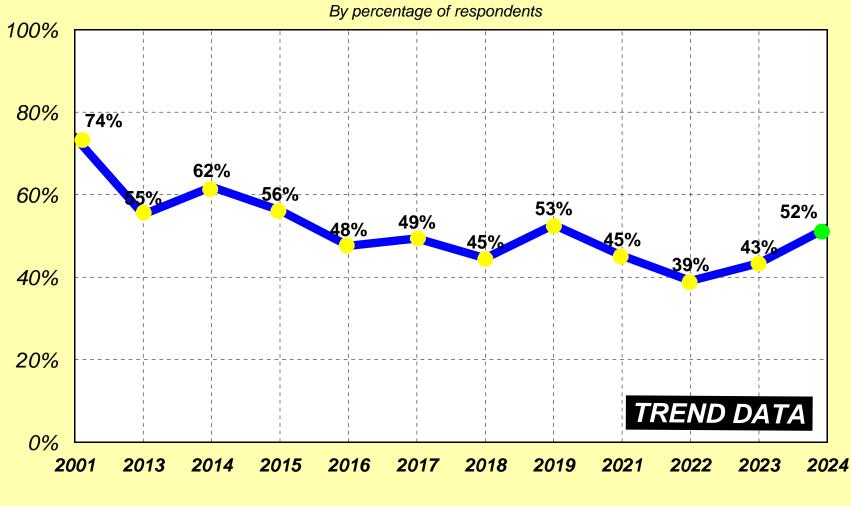

Q11: Do you remember seeing or hearing specific notifications about days with high levels of smoke or particulate matter?

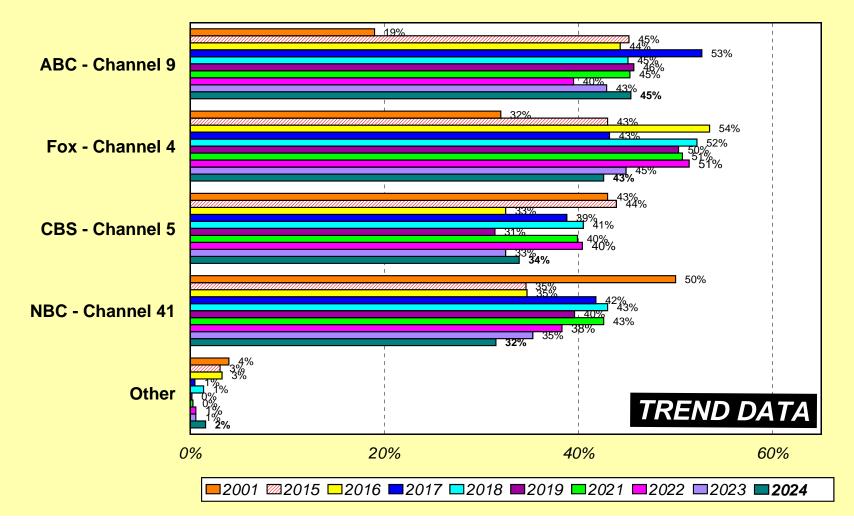

Q12: Have you seen Ozone "SKYCAST" information during the weather forecast on local television news or a Spanish-language TV station?

Q12: Percentage of Residents Who Have Seen "SKYCAST" Information During Weather Forecasts on Local Television News

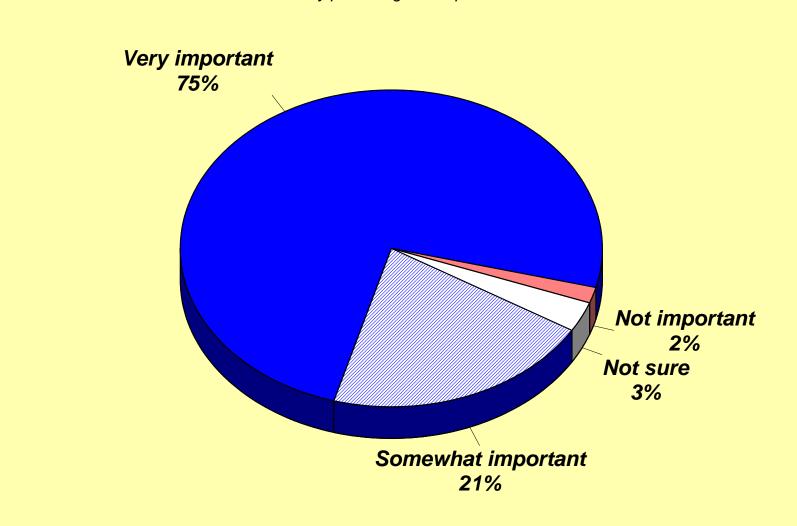

Q12a: Percentage of Residents Who Have Seen "SKYCAST" Information on Local Television Stations

By percentage of respondents who had seen "SKYCAST" information

Q12b: How Important Residents Think It Is for Local Television News to Provide "SKYCAST" Information

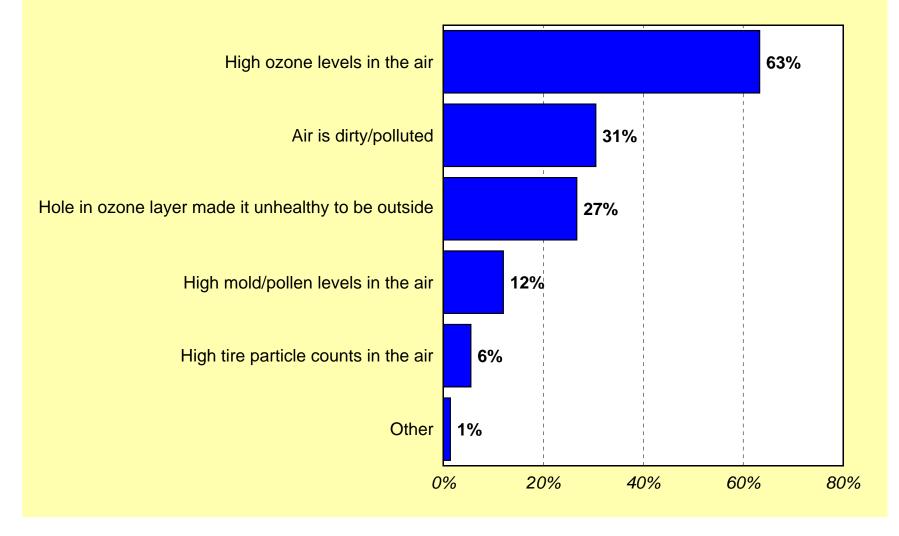

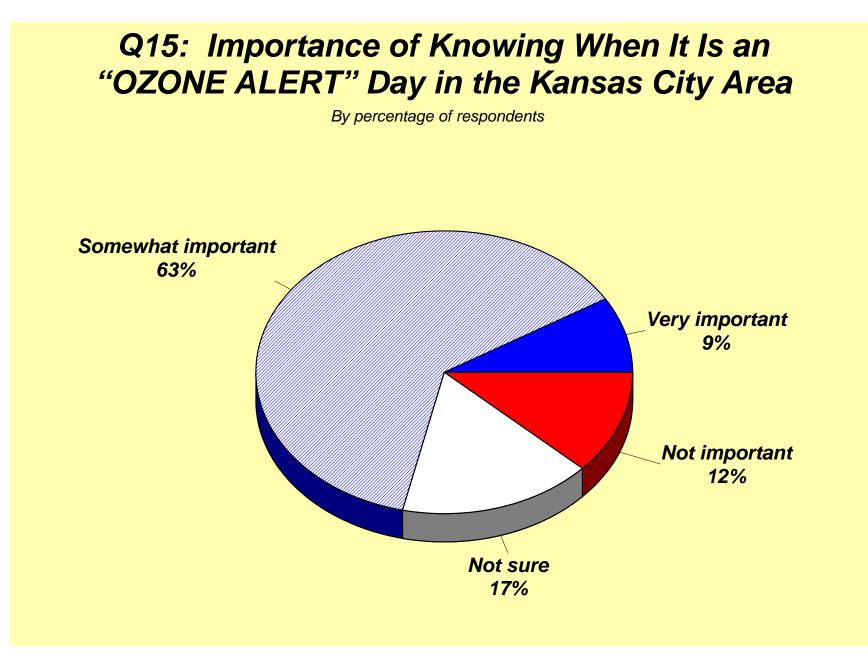

Q13: Do you remember hearing notifications about any "OZONE ALERT" days?

By percentage of respondents Yes 71% No 29%

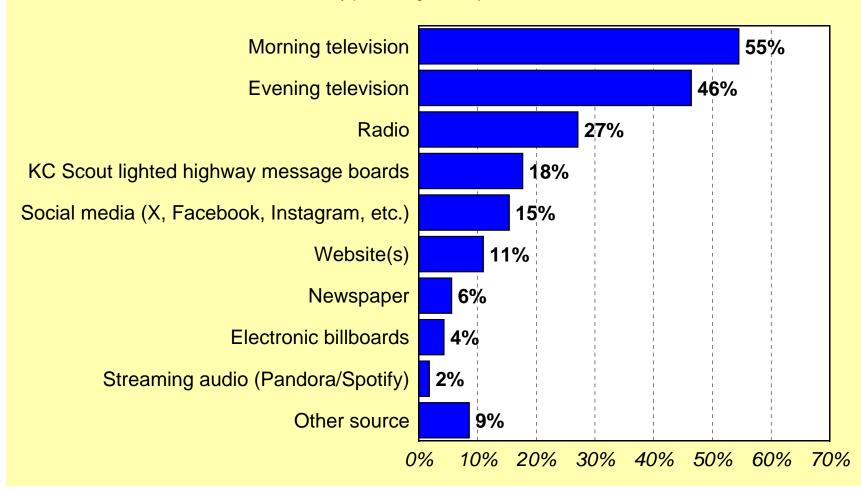

Q14: What do you think an "OZONE ALERT" day means?

By percentage of respondents (excluding "don't know")

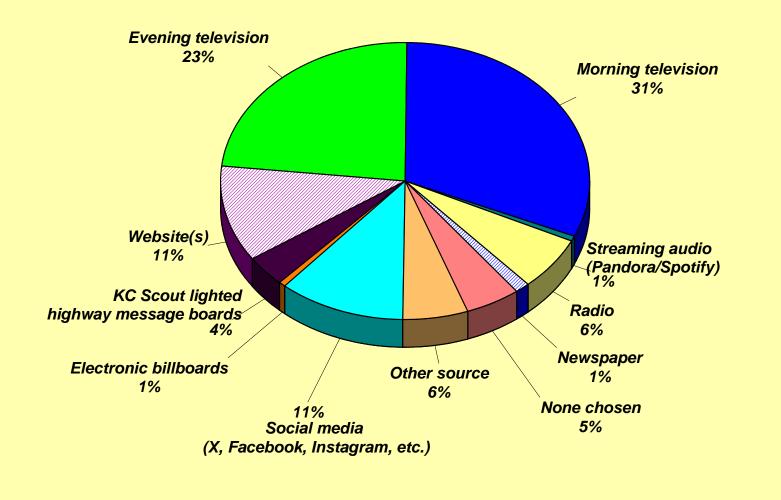

Q16: Have you seen or heard the phrase "OZONE ALERT" used to describe air quality in the Kansas City area from any of the following sources?

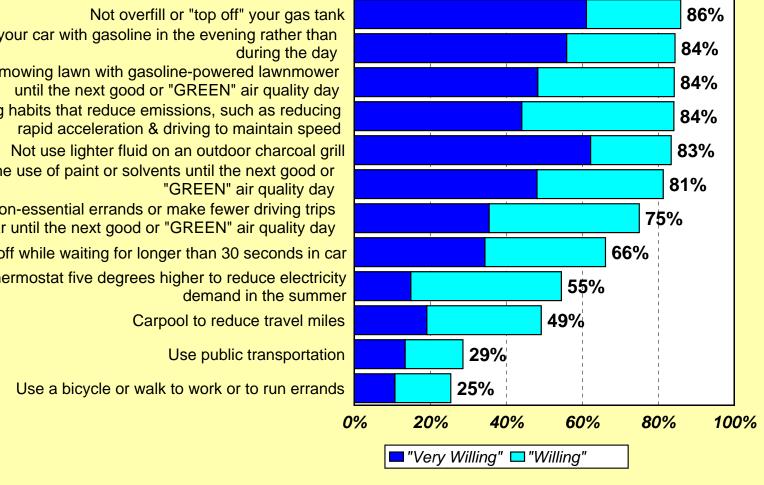

Q16a: Which ONE of these sources do you consult most often?

Q17a: Willingness of Residents to Do Various Activities on an OZONE ALERT Day in the Kansas City Area

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing") By percentage of respondents who were "very willing" or "willing"

Fill up your car with gasoline in the evening rather than Postpone mowing lawn with gasoline-powered lawnmower Adopt driving habits that reduce emissions, such as reducing Postpone the use of paint or solvents until the next good or

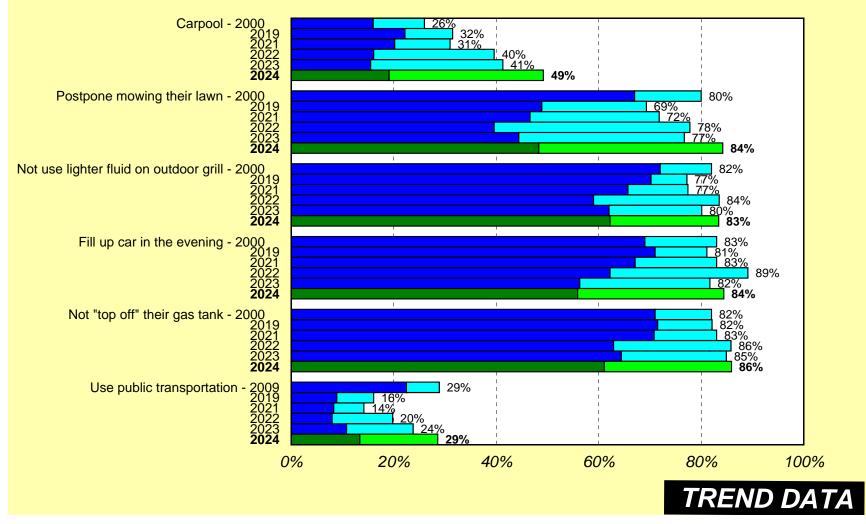

Postpone non-essential errands or make fewer driving trips by car until the next good or "GREEN" air quality day

Turn engine off while waiting for longer than 30 seconds in car

Set your thermostat five degrees higher to reduce electricity

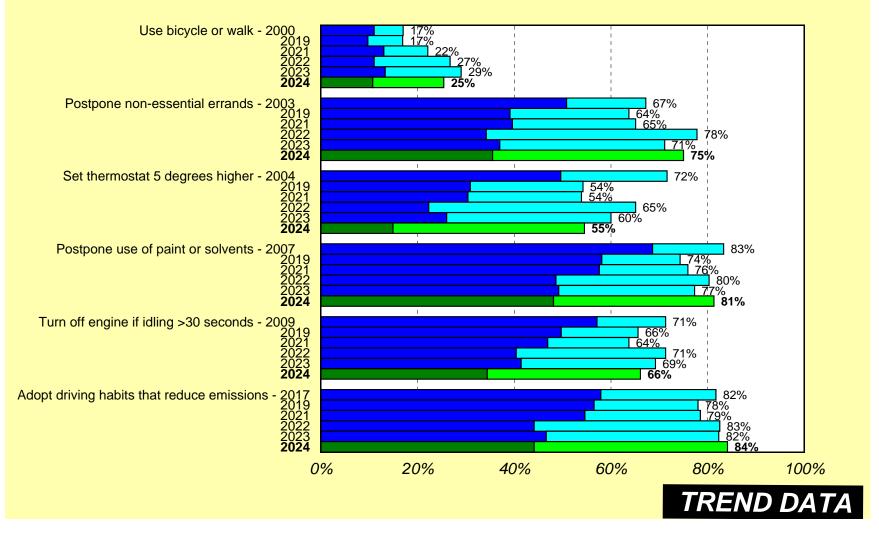

Q17a: Willingness of Residents to Do Various Activities on an OZONE ALERT Day in the Kansas City Area

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing") By percentage of respondents who were "very willing" or "willing"

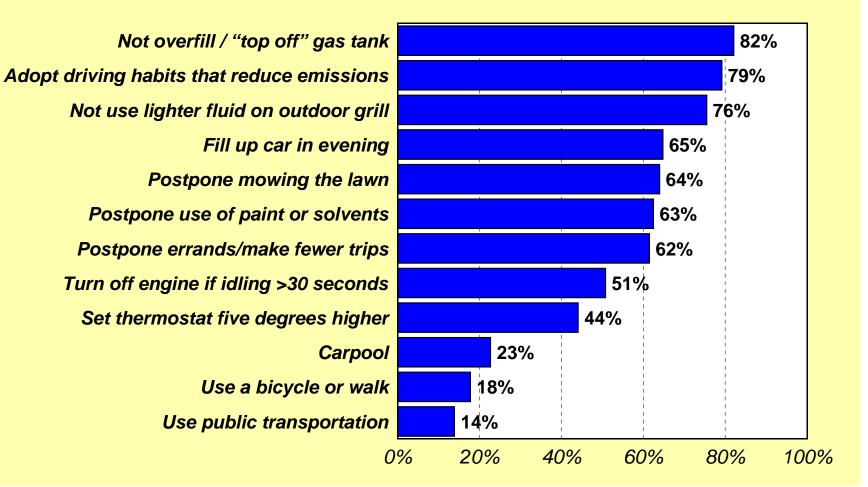

Q17a (CONTINUED): Willingness of Residents to Do Various Activities on an OZONE ALERT Day in the Kansas City Area

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing") By percentage of respondents who were "very willing" or "willing"

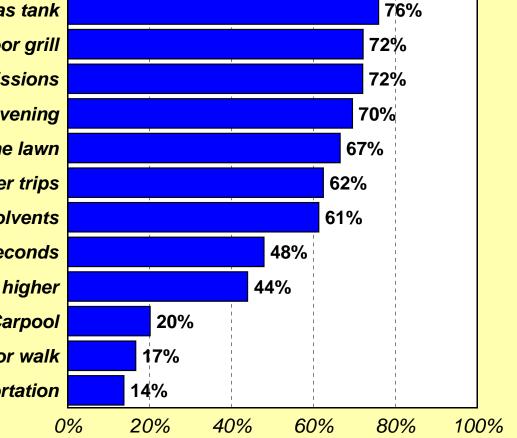

Q17b: Actions Kansas City Area Residents Do Regularly <u>(Even When It Is NOT an Ozone Alert Day)</u>

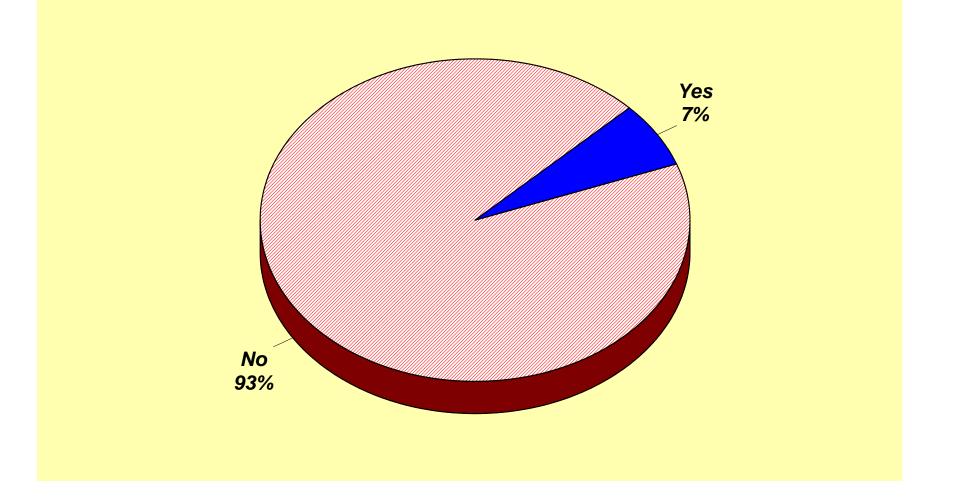

Q17c: Actions Kansas City Area Residents Already Do In Response to an Ozone Alert Day Notification

By percentage of respondents

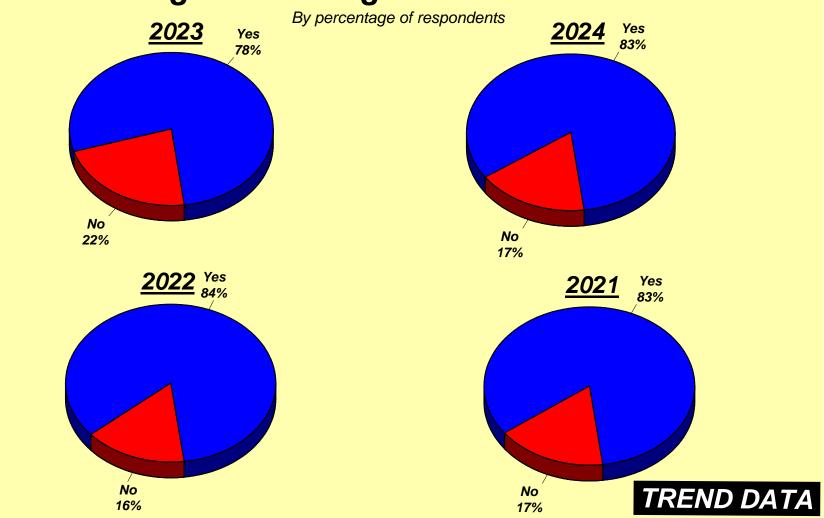

Not overfill / "top off" gas tank Not use lighter fluid on outdoor grill Adopt driving habits that reduce emissions Fill up car in evening Postpone mowing the lawn Postpone errands/make fewer trips Postpone use of paint or solvents Turn off engine if idling >30 seconds Set thermostat five degrees higher 20% Carpool Use a bicycle or walk 17% 14% Use public transportation 0% 20% 40%

Q18: Have you heard about the AirQ Program or AirQKC.org?

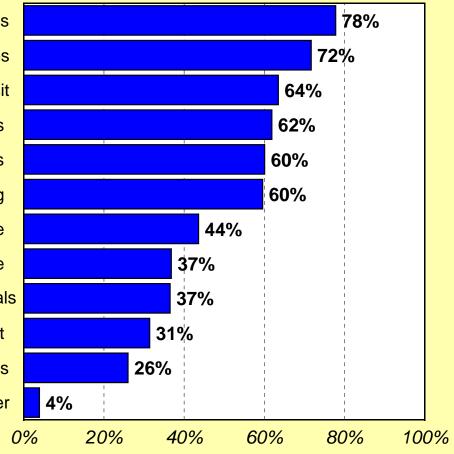

Q19: Do you or would you support efforts by your Municipal/County government to reduce greenhouse gas emissions?

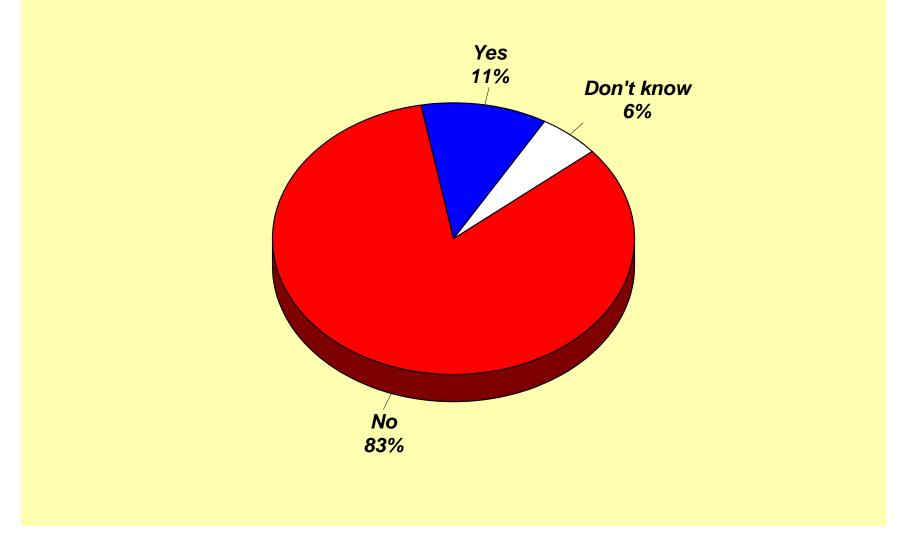

Q19a: Which of the following do you think should be the top strategies your municipal or county government should use to reduce greenhouse gas emissions?

By percentage of respondents (multiple selections could be made)

Use energy from renewable sources Plant more trees Improve public transit Establish energy efficient building codes Educate about reducing greenhouse gases Plant wildflowers/grasses to reduce mowing Policies to promote more efficient land use Increase opportunities for people to walk/bike Provide Spanish translation of educational materials Buy Energy Star office equipment Develop Car Sharing/Bicycle Sharing opportunities Other

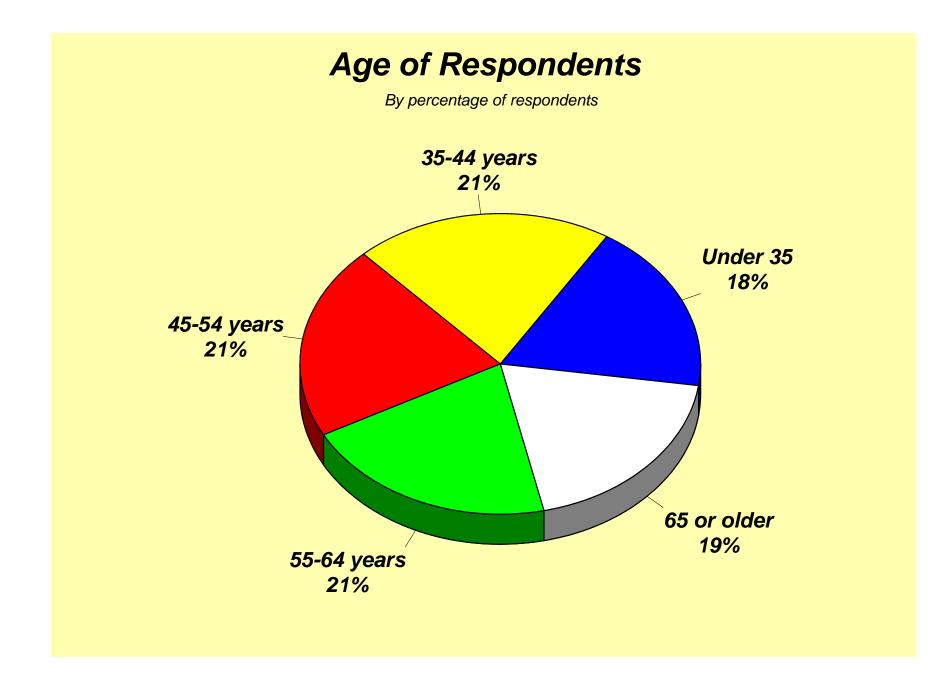

Q20: Have You Heard About "Operation Green Light"?

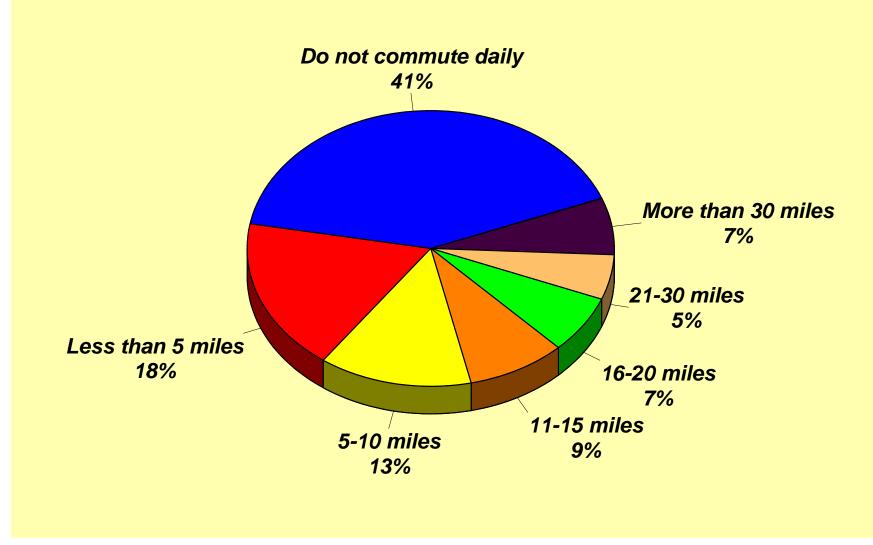

2024 MARC Annual Air Quality Awareness Survey: Final Report

Demographics

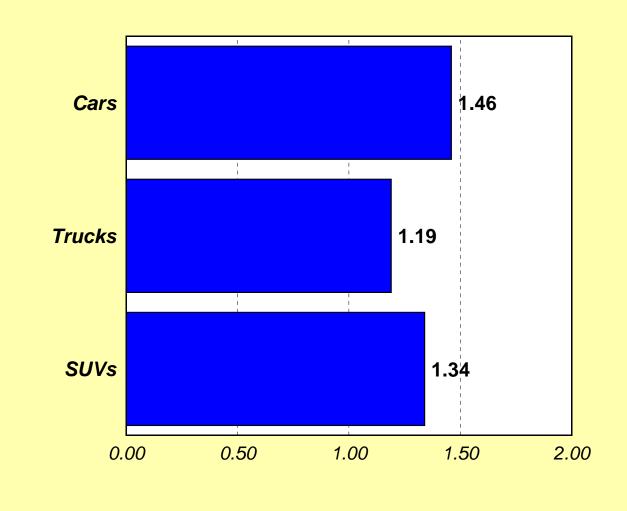

Average Distance of Normal Daily Commute (one way)

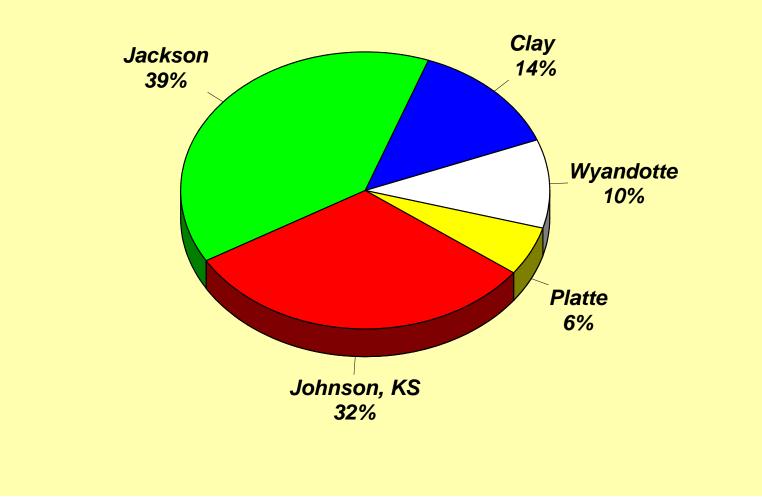

Number of Vehicles Owned by Household

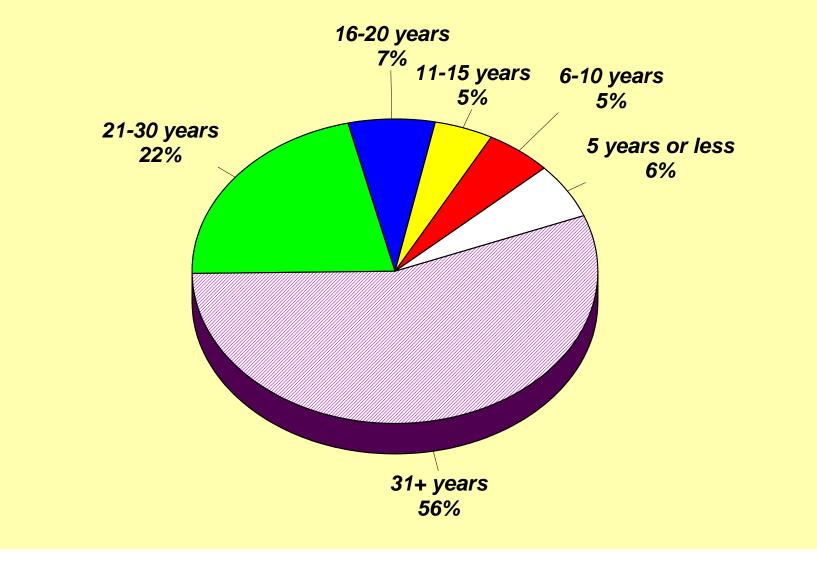

Avg. Number of Vehicles Per Household = 3.97

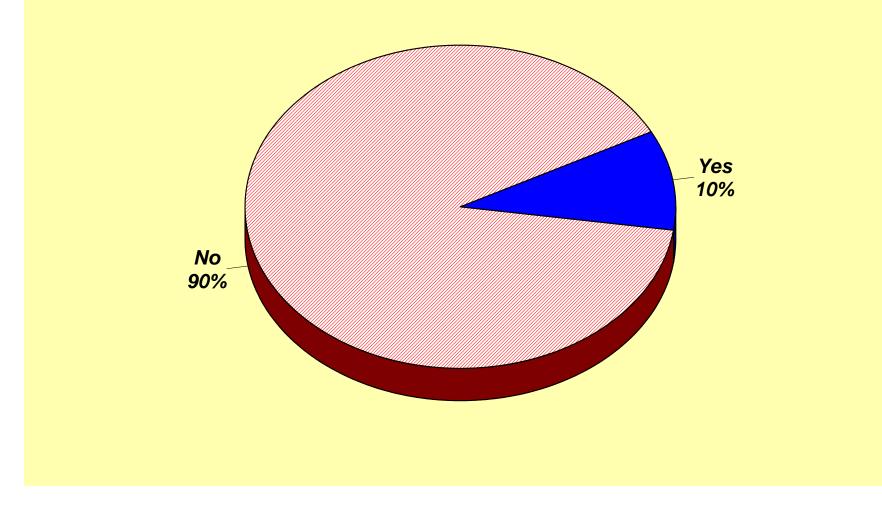

County Where Respondents Live

How long have you lived in the Kansas City area?

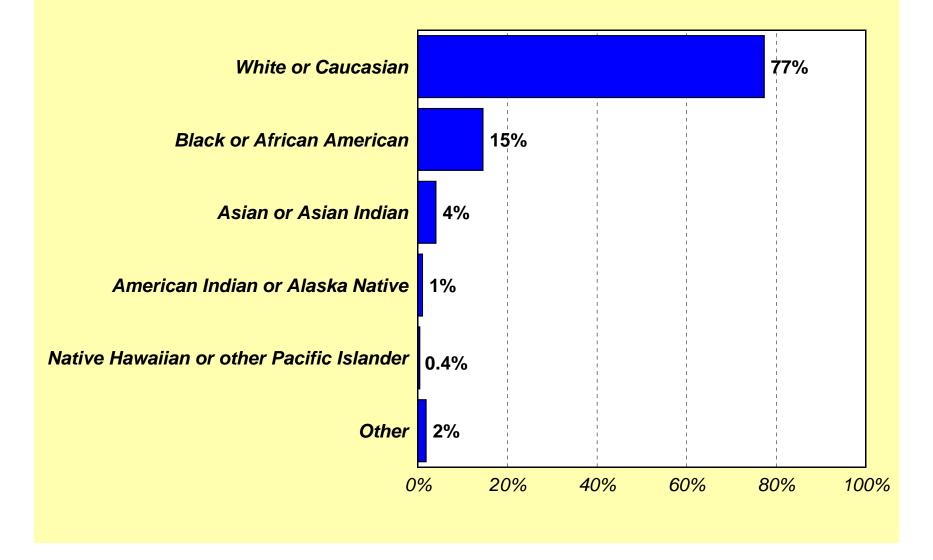

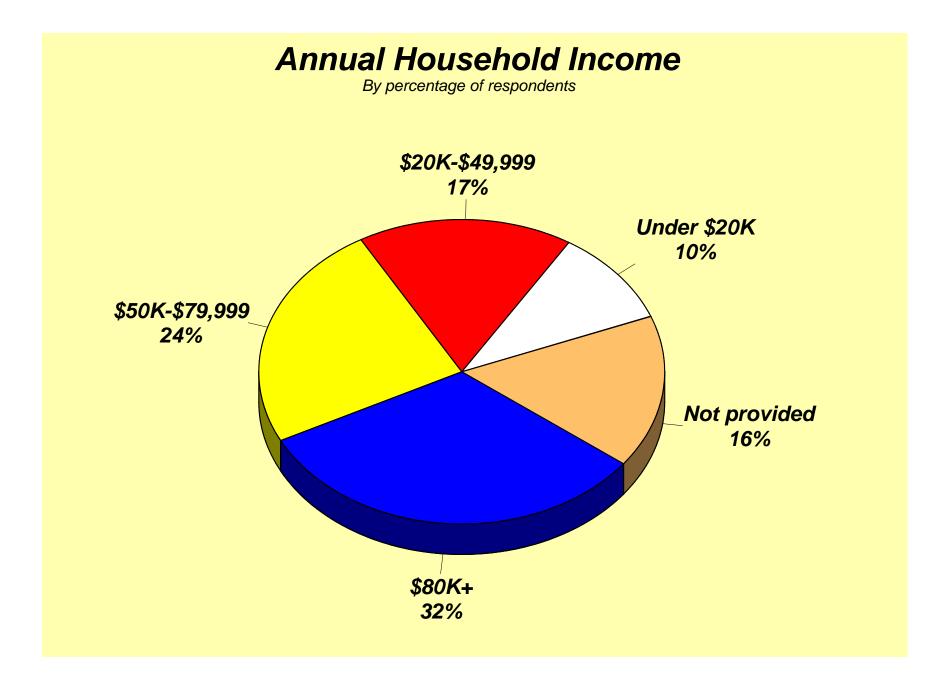

Are you or other members of your family of Hispanic, Spanish, or or Latino/a/x ancestry?

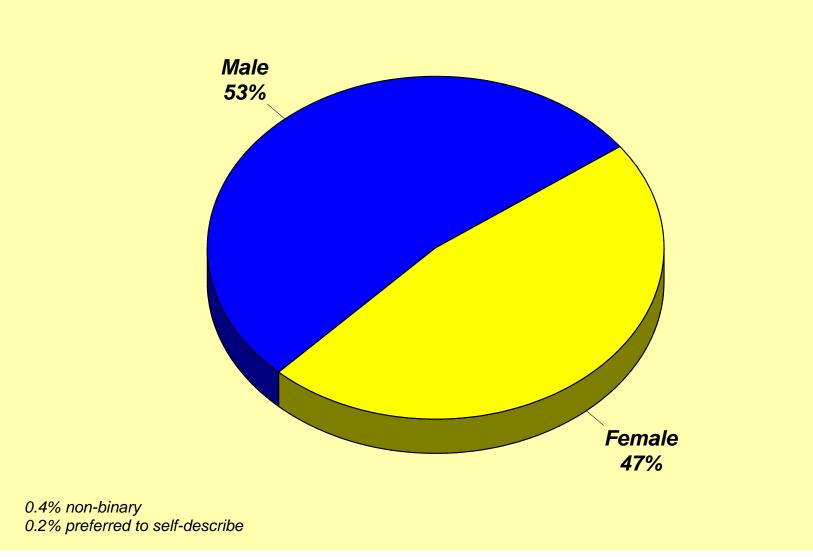

Race/Ethnicity

By percentage of respondents (multiple selections could be made)

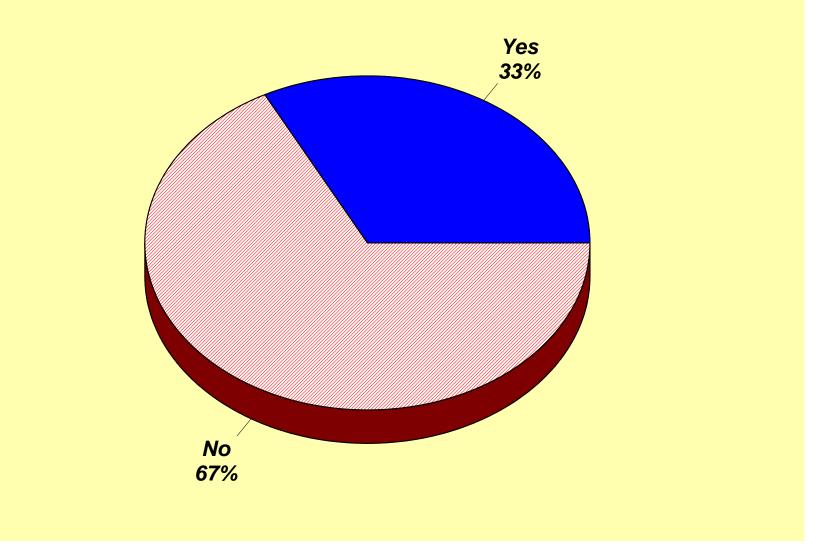

Gender of Respondents

Households with Children 17 Years or Younger

Section 2: Tabular Data

Q1. Compared to last year, would you say you...

| Q1. What would you say you are compared to last year | Number | Percent |
|--|--------|---------|
| Are more aware of air quality issues in Kansas City area | 225 | 26.8 % |
| Have about the same level of awareness of air quality issues | 540 | 64.3 % |
| Are less aware of air quality issues in Kansas City area | 57 | 6.8 % |
| Not applicable (did not live in Kansas City area last year) | 11 | 1.3 % |
| Not provided | 7 | 0.8 % |
| Total | 840 | 100.0 % |

WITHOUT "NOT SURE"

Q9. People reduce air pollution for different reasons. Using a 5-point scale where 5 means "A Lot of Motivation" and 1 means "Little Motivation," please indicate how much motivation the following give you to help reduce air pollution? (without "not sure")

(N=840)

| | A lot of | 4 | 2 | 2 | Little |
|--|---------------------|-------------------|---------|------------------|---------------------|
| Q9-1. Global warming/climate change | motivation 44.7% | <u>4</u> 15.9% | 3 14.0% | <u>2</u> 5.1% | motivation 20.3% |
| Q9-2. Reducing smog | 41.7% | 20.7% | 17.4% | 8.4% | 11.8% |
| Q9-3. Health effects of air pollution | 55.0% | 18.9% | 13.5% | 4.4% | 8.1% |
| Q9-4. Energy independence | 39.8% | 21.9% | 21.2% | 7.4% | 9.8% |
| Q9-5. Knowing about new regulations due to EPA violations | 24.3% | 18.3% | 23.7% | 10.8% | 23.0% |
| Q9-6. Knowing an OZONE ALERT has been issued | 50.3% | 21.4% | 14.7% | 6.4% | 7.1% |
| Q9-7. Feeling the action is the "right thing to do" or good for the environment | 47.4% | 21.7% | 16.2% | 5.9% | 8.8% |
| Q9-8. Knowing the action you do is easy & will not interfere with your routine | 36.7% | 27.6% | 18.2% | 7.4% | 10.1% |
| Q9-9. Knowing that you could save money | 53.4% | 22.4% | 12.8% | 5.4% | 5.9% |
| Q9-10. Reducing your carbon footprint | 36.8% | 21.1% | 18.2% | 8.2% | 15.7% |
| Q9-11. Knowing that your local government has developed or is developing a climate protection plan | 34.7% | 22.7% | 16.4% | 6.8% | 19.3% |

| Q10. Top choice | Number | Percent |
|--|--------|---------|
| Global warming/climate change | 296 | 35.2 % |
| Reducing smog | 41 | 4.9 % |
| Health effects of air pollution | 243 | 28.9 % |
| Energy independence | 48 | 5.7 % |
| Knowing about new regulations due to EPA violations | 13 | 1.5 % |
| Knowing an OZONE ALERT has been issued | 56 | 6.7 % |

| Q17-12. Adopt driving habits that reduce emissions, such as reducing rapid acceleration & driving to maintain your speed | 44.1% | 40.0% | 10.3% | 3.1% | 2.6% |
| Q17-13. Other | 48.9% | 35.6% | 15.6% | 0.0% | 0.0% |

Q17-13. Other

- Any action that is or becomes crucial to clean air.
- Any recommendations from reliable sources.
- Anything that hasn't already been stated.
- Anything that would help.
- Anything that would make a difference.
- Because people have to work and they drive long distant .plus when cutting grass it only what people have to do to keep .the grass for getting taller.
- carpool, plan trips
- Change habits of household activities. Help educate & spread the word.
- City transportation
- Combine errands with family.
- Depends on what is being asked or told and possibly not applicable to me-retired
- Dong what I can to reduce my carbon footprint
- drive an EV
- Go electric
- Growing as many plants as possible.
- Have workplaces give permission for everyone to work at home. Sorry, but this is a major duh option! On the turn your thermostat 5 degrees higher, that is not reasonable for those of us who are already environmentally conscious to do my family keeps ours at 78 already. If everyone would do that or was forced to do that and not just put the temperature wherever they wanted (especially including businesses!), it would ease demand significantly. There's no reason that anyone should need the air conditioning lower than about 74.
- I'd be happy to take public transportation, if it were more convenient.
- Make errands in one outing properly aligned for efficiency.
- no plastic no gas
- Not burning anything in the outdoor fire pit.
- Outlaw drive-through restaurants
- People also need to keep their cars maintained
- Plant more trees
- recycle, buy glass products, solar if was affordable
- Reduce the fireworks on the 4th of July to where only professionals can light them off
- Run dryer at night, turn lights off, unplug unused electronics.
- Saving energy and water consumption and not washing a half empty load.
- Since I have COPD W/ASTHMA when it's an OZONE ALERT DAY I can't go outside. So my carbon footprint for the day will be 0
- Something that would help that I could do
- stay home
- Study more about ways to help my community and environment and also keep influencing others to help do their part
- There needs to be a change to the traffic lights. Remove lights that cause excessive idling such as those just there for ease of access to shopping centers.
- Try to work from home and not drive as much
- Use less electricity in prime time usage
- Using cruise control to regulate fuel usage while driving.

Q17-13. Other

- Using the dishwasher, washer and dryer between 4am and 8am or after 8pm.
- Void using car unless absolutely necessary. No bbq if outside on those days. Neighbors and I carpooling to grocery store.
- Volunteering to disseminate information
- Welcome new suggestions of how to tackle the problem
- What is being recommended for the good of air quality for us all...
- Whatever recommendations are scientifically shown to help.
- Work from home to reduce commute to office
- Work from home. You should engage companies in kansas city to allow work from home on high ozone days. When employees can of course
- Work with local government to ensure native landscaping is adopted throughout the county
- Working hard and trying to absolve the issues of the ozone layer being infiltrated with mold and fungus and pollen
- Working remotely to stay off the roads
- Would need to determine.

Q17. Do you already do this regularly (even when it is not an "Ozone Alert" day)?

| | Yes | No | Not provided |
|--|-------|-------|--------------|
| Q17-1. Carpool to reduce travel miles | 20.8% | 71.1% | 8.1% |
| Q17-2. Postpone mowing lawn with gasoline- powered lawnmower until the next good or "GREEN" air quality day | 59.5% | 33.5% | 7.0% |
| Q17-3. Not use lighter fluid on an outdoor charcoal grill | 69.4% | 22.5% | 8.1% |

Q19. Do you or would you support efforts by your Municipal/County government to reduce greenhouse gas emissions?

Q19. Do you or would you support efforts by your
Municipal/County government to reduce greenhouse
gas emissionsNumberPercentYes69582.7 %No14517.3 %Total840100.0 %

Q19a. Which of the following do you think should be the top strategies your Municipal or County government should use to reduce greenhouse gas emissions?

Q19a. Which following should be the top strategies your municipal or county government should use to Nu<u>mber</u> reduce greenhouse gas emissions Percent Improve public transit 441 63.5 % Increase opportunities for people to walk & bicycle 256 36.8 % Establish policies that promote more efficient land use 303 43.6 % Plant more trees 498 71.7 % Reduce the need for lawn mowing by planting wildflowers & native grasses 414 59.6 % Buy Energy Star office equipment 218 31.4 % Educate government employees & local residents about things individuals can do to reduce greenhouse gases 418 60.1 % Provide Spanish translation of educational materials about things individuals can do to reduce greenhouse gas emissions 254 36.5 % Use energy from renewable sources like solar & wind 541 77.8 % Establish energy efficient building codes 430 61.9 % Develop car sharing or bicycle sharing opportunities 181 26.0%27 3.9 % Other Total 3981

Q19a-12. Other

- Adopt city planning ideas as in the book The 15-minute City.
- All viable options should be considered
- Anything not listed that is beneficial
- Appeal to lawmakers to eliminate caps on personal stored energy. Monthly savings don't warrant solar investment because we can only go "off grid" less than 50% of energy use per month.
- Ban fireworks and control smoke
- Build major power grids on wasteland away from cities, or farmland desert Southwest
- Clay county is not walker/bike friendly
- Encourage work from home opportunities, perhaps offer tax discount.
- Government provide grants to homeowners (not just businesses) for making energy efficiency upgrades to homes.
- I am disabled. I drove my 2005 Chevy Aveo with less than 27 thousand miles 60 miles between December and June of this year. Your questions really don't include people like me. That's why so many questions haven't been answered.
- I'm also interested in air quality regarding transmission of airborne infections. We need better air quality standards.
- make solar panels really affordable so it pays off before you die or move
- Offer tax incentives and grant money to help homeowners make changes like add solar panels or return portions of their yard to prairie and plant trees. Change the codes to legally allow for more native plants. Offer free or cheap native plants, etc.
- Promote Leed certification for buildings. Also, mandate ways to reduce trash and litter. Make solar power cheap for apartment buildings to obtain. I see a lot of apartments being built and it would be a step forward to make them all solar powered without it being costly for landlords. The streetcar is not enough for public transit in the city. We should have a subway system.
- Put in passenger rail/light rail/monorail lines into Kansas City, and from JCCC to Lawrence.
- Remove non essential traffic signals that cause excessive idling such as those for ease of access to shopping centers. Time other lights so you do not stop and idle within view of your last stop light.
- Shut down the meth labs
- Solar power for government buildings, solar incentives for citizens, more electric vehicles for government, local EV incentives, more free or affordable EV charging stations.
- Stop mowing roadsides unless growth is a safety hazard.
- stop using plastic
- Support or Subsidize housing insulation. Socialize utilities -- replace 'profit' with 'service'.
- Upgrade insulation in older housing (which has been more cost-effective than most of what was suggested above); tax conspicuous consumption;
- We are retired. We need communities where you can walk to store and restaurants near your home. We need retirement community developments. We could move from our homes so young people could buy them and we could move to communities that would work better for us.
- We should consider Any recommendations

Section 3: Survey Instrument

June 2024

Air Quality: Make your voice heard

Dear Clay, Jackson, Johnson, Platte and Wyandotte County residents:

The MARC Air Quality Program is conducting a survey to help us better understand how residents feel about a wide range of issues related to regional air quality, including:

- Your perceptions of air quality in the Kansas City region.
- How you receive air quality information and alerts.
- How often you do activities that affect our air quality.
- How important air quality is to you.

Your feedback will help us set priorities, adjust our outreach activities and identify important educational messages for the coming year.

We have contracted with ETC Institute, a professional survey firm in Olathe, KS, to conduct this survey. Your address was selected at random for participation. All individual responses are confidential, and results will be shared only in a summary format. Please complete the survey and return it in the enclosed postage-paid envelope within the next two weeks. If you prefer to take the survey online, you may do so at <u>MARCAirQualitySurvey.com</u>. As our way of thanking everyone who participates, ETC Institute will randomly select one respondent to receive a \$500 Visa gift card.

Thank you for taking the time to complete the survey. Your participation will benefit all Kansas City metro area residents.

If you have any questions, please feel free to contact Doug Norsby, Air Quality Planner at the Mid-America Regional Council, at (816) 474-4240 or <u>airq@marc.org</u>.

Sincerely,

Louglas & Morsby

Doug Norsby Air Quality Program Mid-America Regional Council

2024 MARC Air Quality Survey

Thank you for taking the time to complete this important survey! Your input will be used to determine perceptions of air quality issues in the metropolitan Kansas City area. This survey takes approximately 15 minutes to complete. When finished, please return your completed survey in the postage-paid envelope provided; you may also complete this survey online at. <u>MARCAirQualitySurvey.com</u>. Everyone who completes the survey will be given a chance to enter a random drawing for a \$500 Visa gift card. If you have questions about the survey, please contact Doug Norsby at (816) 474-4240 or <u>airg@marc.org</u>. Thank you!

7b. Using the list from Question 7a on the previous page, write the number of the ONE promotional media that is your most frequent source of information about air quality. [Write in your answer below using the numbers from the list in Question 7a.]

MOST FREQUENT information source: _____

8. Which THREE of the following sources would you MOST prefer to receive information about air quality in your community? [Write in your answers using the numbers from the list below.]

- **01**. Internet source that is easy to find
- 02. Facebook
- 03. 'X'
- 04. Instagram
- 05. Email
- **06**. Specific telephone number to get information

07. City newsletter

- 08. Your local newspaper
- **09**. Kansas City Star **10**. Television
- 10. Television
- 11. Radio

1st: ____ 2nd: ____ 3rd: ____

9. People reduce air pollution for different reasons. Using a 5-point scale where 5 means "A Lot of Motivation" and 1 means "Little Motivation," please indicate how much motivation the following give you to help reduce air pollution?

| | Reasons | A Lot of Motivation | * | * | * | Little Motivation | Not Sure |
|-----|---|------------------------|---|---|---|----------------------|----------|
| 01. | Global warming/climate change | 5 | 4 | 3 | 2 | 1 | 9 |
| 02. | Reducing smog | 5 | 4 | 3 | 2 | 1 | 9 |
| 03. | Health effects of air pollution | 5 | 4 | 3 | 2 | 1 | 9 |
| 04. | Energy independence | 5 | 4 | 3 | 2 | 1 | 9 |
| 05. | Knowing about new regulations due to EPA violations | 5 | 4 | 3 | 2 | 1 | 9 |
| 06. | Knowing an OZONE ALERT has been issued | 5 | 4 | 3 | 2 | 1 | 9 |
| 07. | Feeling the action is the "right thing to do" or good for the environment | 5 | 4 | 3 | 2 | 1 | 9 |
| 08. | Knowing the action you do is easy and will not interfere with your routine | 5 | 4 | 3 | 2 | 1 | 9 |
| 09. | Knowing that you could save money | 5 | 4 | 3 | 2 | 1 | 9 |
| 10. | Reducing your carbon footprint | 5 | 4 | 3 | 2 | 1 | 9 |
| | Knowing that your local government has developed or is developing a climate protection plan | 5 | 4 | 3 | 2 | 1 | 9 |

10. Which TWO of the items listed in Question 9 above do you think are the MOST IMPORTANT reasons to reduce air pollution? [Write in your answers below using the numbers from the list in Question 9.]

1st: ____ 2nd: ____

11. Do you remember seeing or hearing specific notifications about days with high levels of smoke or particulate matter?

| (1) Yes | (2) No |
|---------|--------|
|---------|--------|

12. Have you seen Ozone "SKYCAST" information during the weather forecast on local television news or a Spanish-language TV station?

____(1) Yes [Answer Q12a-b.] ____(2) No [Skip to Q13.]

| 12a. | On which TV stations have | ou seen "SKYCAST" informa/ | tion? [Check all that apply.] |
|------|---------------------------|----------------------------|-------------------------------|
|------|---------------------------|----------------------------|-------------------------------|

____(1) NBC - Channel 41 ____(2) CBS - Channel 5 (3) Fox - Channel 4 (4) ABC - Channel 9 ____(5) Other: _____

(1) Not important

(2) Not sure

12b. How important do you think it is for local television stations to provide "SKYCAST" information?

(4) Very important (3) Somewhat important

| | (2) High tire particle counts in the air (3) High ozone levels in the air (4) The hole in the ozone layer has made it unhealthy to be outside | | | | (6) Other: (7) I don't know what an "OZONE ALERT" day means | | | | | | |
|-----|---|--------------|-------------------|-----------------------|--|--------------------------------|----------|--------------------------------|---|--------------------------|---|

13.

14.

____(1) Yes

____(2) No

____(1) High mold/pollen levels in the air

18. Have you heard about the AirQ Program or our website, AirQKC.org?

____(1) Yes (Where did you hear about it? _____

(2) No

)

Do you or would you support efforts by your municipal/county government to reduce greenhouse 19. gas emissions?

____(1) Yes [Answer Q19a.] ____(2) No [Skip to Q20.]

19a. Which of the following do you think should be the top strategies your municipal or county government should use to reduce greenhouse gas emissions? [Check all that apply.]

- (01) Improve public transit
- (02) Increase opportunities for people to walk and bicycle
- (03) Establish policies that promote more efficient land use
- ____(04) Plant more trees
- (05) Reduce the need for lawn mowing by planting wildflowers and native grasses
- (06) Buy Energy Star office equipment
- (07) Educate government employees and local residents about things individuals can do to reduce greenhouse aases
- (08) Provide Spanish translation of educational materials about things individuals can do to reduce greenhouse gas emissions
- (09) Use energy from renewable sources like solar and wind
- ____(10) Establish energy efficient building codes
- ____(11) Develop car sharing or bicycle sharing opportunities
- ____(12) Other: _____

Have you heard about "Operation Green Light," a regional effort to coordinate traffic signals at 20. intersections on major routes which cross multiple government jurisdictions?

(1) Yes (2) No (9) Don't know

Your responses to the following questions will remain completely confidential and will not Demographics: be associated with your household in any way. The purpose of the questions in this section is to help MARC further analyze and understand the survey data collected.

What is your age? _____ years 21.

22. Approximately how far is your normal daily commute one-way?

____(1) Not employed, work ____(6) 21-30 miles ____(3) 5-10 miles (3) 5-10 miles (6) 21-30 miles (7) More than 30 miles from home, or retired (2) Less than 5 miles (5) 16-20 miles

How many cars, trucks or SUVs are in your household? [If you have none, please write "0."] 23.

of cars: _____ # of trucks: _____ # of SUVs: _____

24. What county do you live in?

| | (1) Clay | (2) Jackson | (3) Johnson (Kansas) | (4) Platte | (5) Wyandotte |
|--|----------|-------------|----------------------|------------|---------------|
|--|----------|-------------|----------------------|------------|---------------|

- 25. Approximately how long have you lived in the Kansas City area? _____ years
- Are you or any members of your family of Hispanic, Spanish, or Latino/a/x ancestry? 26.

| 2) | No |
